

## **I. Uses and Disclosures for Treatment, Payment, and Health Care Operations**

We may use or disclose your protected health information (PHI), for treatment, payment, and health care operations purposes with your consent. To help clarify these terms, here are some definitions:

*"PHI"* refers to information in your health record that could identify you. *"Treatment, Payment and Health Care Operations"*

- *Treatment* is when we provide, coordinate or manage your health care and other services related to your health care. An example of treatment would be when we consult with another health care provider, such as your family physician or another Therapist. Another example would be when we release your treatment plan to your insurance company and/or to your primary care physician.

- *Payment* is when we obtain reimbursement for your healthcare. Examples of payment are when we disclose your PHI to your health insurer to obtain reimbursement for your health care or to determine eligibility or coverage.

- *Health Care Operations* are activities that relate to the performance and operation of my practice. Examples of health care operations are quality assessment and improvement activities, business-related matters such as audits and administrative services, and case management and care coordination.

*"Use"* applies only to activities within our [office, clinic, practice group, etc.] such as sharing, employing, applying, utilizing, examining, and analyzing information that identifies you.

*"Disclosure"* applies to activities outside of our [office, clinic, practice group, etc.], such as releasing, transferring, or providing access to information about you to other parties.

## **II. Uses and Disclosures Requiring Authorization**

We may use or disclose PHI for purposes outside of treatment, payment, or health care operations when your appropriate authorization is obtained. An *"authorization"* is written permission above and beyond the general consent that permits only specific disclosures. In those instances when we asked for information for purposes outside of treatment, payment or health care operations, we will obtain an authorization from you before releasing this information. We will also need to obtain an authorization before releasing your Psychotherapy Notes. *"Psychotherapy Notes"* are notes we have made about your conversation during a private, group, joint, or family counseling session, which we have kept separate from the rest of your medical record. These notes are given a greater degree of protection than PHI.

You may revoke all such authorizations (of PHI or Psychotherapy Notes) at any time, provided each revocation is in writing. You may not revoke an authorization to the extent that (1) we have relied on that authorization; or (2) if the authorization was obtained as a condition of obtaining insurance coverage, law provides the insurer the right to contest the claim under the policy.
